

My Best Time in Guam

St. Paul Christian School

First, I met my partner. I was nervous then because it was first time talking to a Guam person in English. But my partner was kind so I had a good time talking. I took 6 classes with my partner in math, English, science, Christianity, history and orchestra. It's difficult for me to study only in English but I could understand mostly because it was something I had already learned in Japan.

In break times and after school, I played volleyball with students of the school.

They are good at playing it so it was fun.

Four days with my lovely host family

There are very fulfilling times of all. My host father and mother are so kind. Guam has many different things from Japan, so I always asked some questions.

They also taught me those things. And I found they like Japan! They have been to Japan several times and my host mother knew "itadakimasu" and some Japanese snacks. I was glad to hear that.

After school and weekend, I did a lot of things.

For example, I went shopping, ate dinner, swam in the beach and went amusement park. It was fun. On Saturday night, we enjoyed the BBQ party with four families. After that, I got a present from them. Those are my treasures.

Comment

It was my first time going abroad so there were a lot of things that were new to me. I was glad to meet friends in Guam and my host family. Also, I am grateful to my parents and my Japanese teachers. Thanks for my valuable experience. These are the happiest experiences in my life!! I hope to visit Guam again and meet friends in Guam and my host family once again.
